Protective Driving Course

Spectrum OSO Asia Ltd.

Chauffeur Driver Training

Overview

Our 1 day Protective Driving Course is designed for non-security trained professional Chauffeur drivers. The aim of the course is to educate Chauffeurs in client security and safety through awareness and preparedness. The short course provides both theoretical and practical learning outcomes in defensive and evasive driving techniques, as well as protective security measures.

Size: Course Size minimum 10.

Cost: B\$15,000 per student

Location: The course will be conducted at our training facility at Lop Buri, 2 hours North of Bangkok.

Course Curriculum

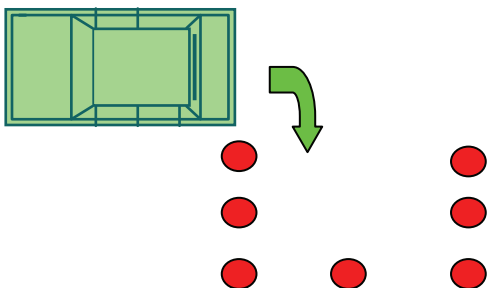

Theoretical and practical lessons learnt during the 1 day driving course are the cornerstone of our driving curriculum for any type of driving. Our training system divides the course into theory and practical teaching periods to enhance a students learning capacity. Each theoretical lesson will be followed directly by a practical period, which will enforce the teaching points.

The 1 day Protective Drivers Course is conducted over an 8 hour period. The course will provide drivers with 4 hour of theoretical instruction and 4 hours of practical instruction.

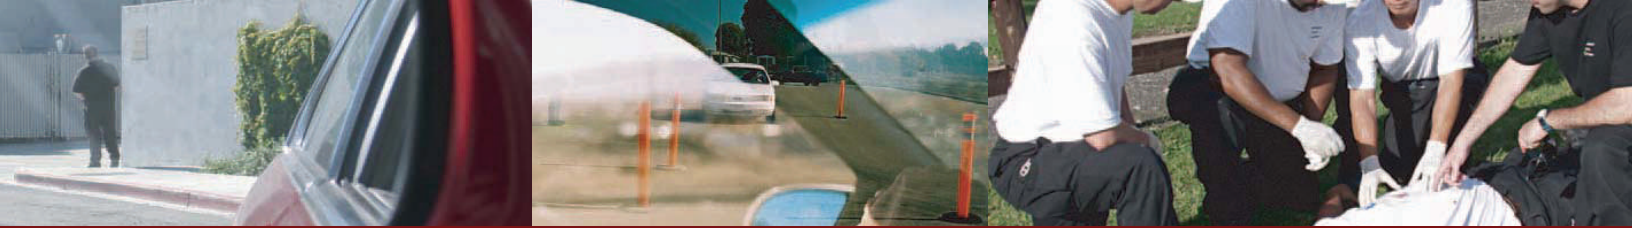

Vehicle Inspection – Numerous individuals have found themselves in a very difficult situation, be it in the heavy morning traffic or on a long journey because of a punctured tire and the spear is also flat. Or the vehicle has over heated, due to a leaking radiated, which could have been averted if the driver conducted regular vehicle inspections.

Vehicle Familiarization – The majority of all drivers are unfamiliar with the vehicles they drive. Understanding the operating system of a vehicle provides drivers a great awareness, understanding and confidence within their working environment.

Driver Familiarization – Drivers are instructed in the importance of their body and hand positioning, as well as being instructed in how to correctly position side and rear vision mirrors. Drivers will be instructed in the correct way to utilize rear view mirrors in reversing maneuvers.

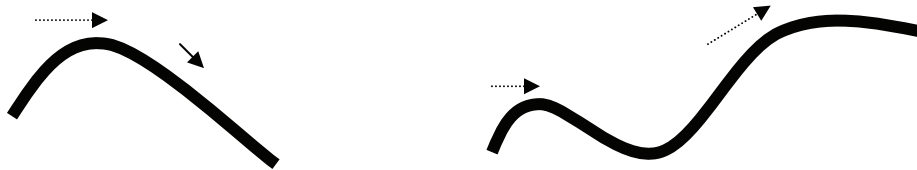

Forward and reverse parking techniques at speed and from varying angles, with and without mirrors.

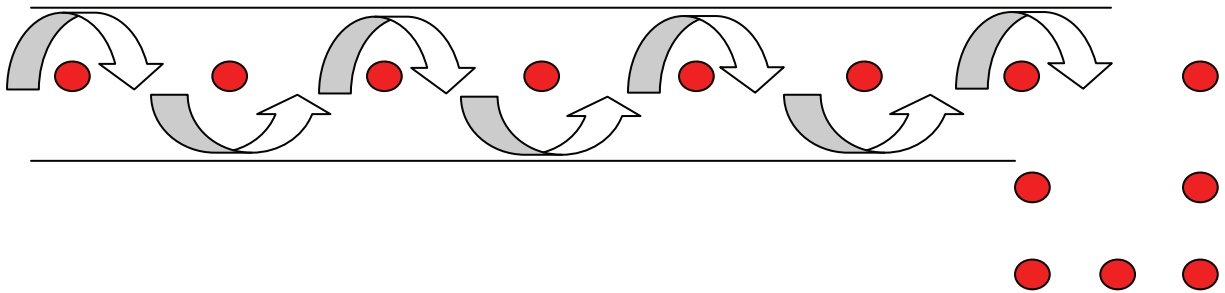

Defensive & Evasive Driving Techniques

Cornering Techniques – Cornering is a maneuver performed by all drivers, however, not truly understood or executed correctly. Students will be instructed in the different types of corners and how gravity affects the maneuver. Students will understand how speed dramatically changes a vehicle body roll and friction with the roads surface.

Types of Corners

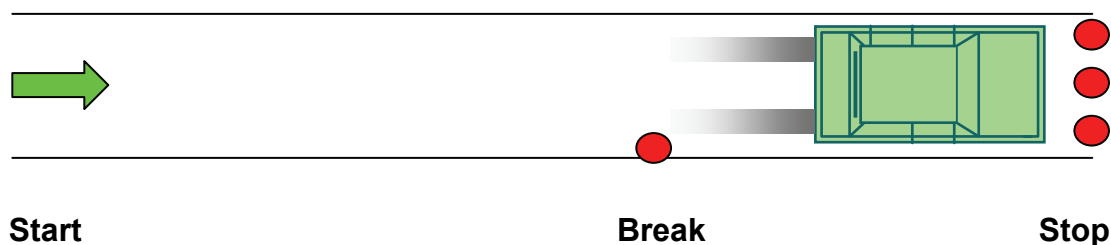

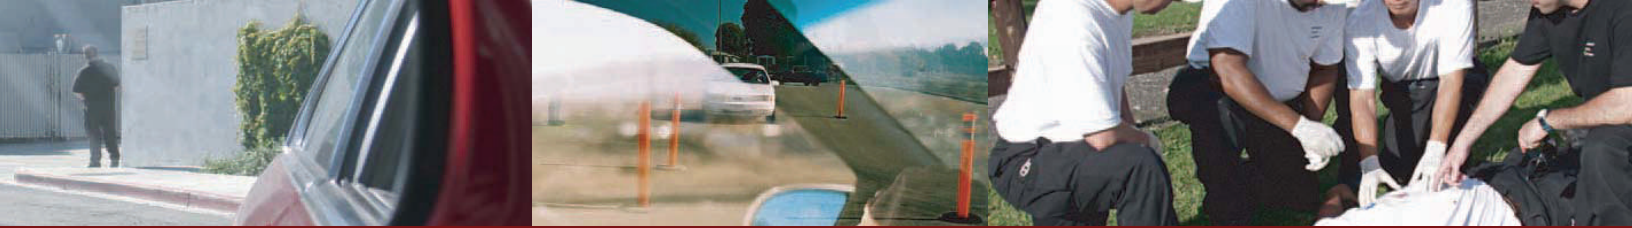

Drivers gain invaluable and personal experience while negotiating the course of 'witches' hats both forward and backwards, at varying speeds how speed, gravity, friction and their position play critical components in their ability to maneuver a vehicle through the course.

Braking Techniques – One's ability to stop or maneuver a car in an emergency situation is often greatly over estimated and one's inability only truly recognized to late. Students will understand how speed dramatically affects a vehicles braking distance and practice the techniques necessary to stop a vehicle at speed or brake and turn to avoid a situation.

Emergency / hi speed breaking and stopping distance

Defensive & Evasive Driving Techniques

Security Awareness – with today's increases in crime and terrorism one never knows until it is too late that you have become the focus of an aggressor. The final phase of the course provides students with real life aggressive incidents that have occurred world wide. This phase of the course is to increase driver's awareness while providing them invaluable techniques that will enhance client safety and security.

Evasive Driving – this subject provided driver an introduction into evasive driving techniques. It is a theoretical lesson only. Drivers will be instructed in some basic evasive techniques invaluable during a potentially life threatening situation, either an intentional attack by an aggressor (e.g. a potential kidnapping situation or an aggressive road rage situation) or an accidental situation were a road accident has create a situation, or a child on the road.

Drivers will be instructed in dynamic vehicle maneuvers such as;

- Reverse & forward 180 degree turns
- K-turn left and right technique
- Left foot breaking techniques
- Hand breaking technique
- Reversing over a long distance at Hi-speed
 - With and with mirrors

Route Planning – Drivers will be instructed in how to plan their route including alternative routes, safe havens and emergency services along the route to enhance safety and security in daily working conditions.

Safe havens – are locations along one's route that provide safety and security. These locations are easily identifiable, so help can be requested. Locations such as police stations or hospitals are not always the best locations.

Emergency – students are also taught to identify emergency facilities along the route in the case of a medical or police emergency.

Route planning teaches drivers to become more aware of their environments and potential trouble spots, such as chock point or surveillance areas. Planning with practice provides drivers with a greater awareness of distance and time.

Street Directory – Being able to read a cities street directory is invaluable skill that the majority of drivers world wide have found impossible to master. Maintaining the ability to locate a destination in a street directly provides an invaluable resource for drivers when planning daily itinerary.

Please Note: This course provides students valuable skills and knowledge pertain to how they can enhance the security & safety of their client. The training is at an introductory level, due to the short nature of the course and each students learning capability. The skills and knowledge gained during this course are perishable, ongoing training is critical, however, difficult in regards to driver training. We offer a range of driving, as well as security & safety courses at all levels. We also provide refresher courses, designed maintain the skills and knowledge.
